Cause: No navigation antenna is embedded or GPS antenna is not set correctly
Solution: Correctly embed the GPS antenna

7. Problem: GPS cannot be located
Cause: The GPS signal is poor, or the GPS antenna is poorly connected.
Solution: Move the location or replace the GPS antenna or re-plug the antenna

▲ **Car entertainment navigation systems are products with excellent design and craftsmanship and should be used with care. The following recommendations will help you fulfill your obligations under the warranty and extend the life of your car's entertainment navigation system.**

- 1. Keep the car entertainment navigation system and all its parts and accessories out of reach of children.
- 2. Please keep it dry. rainwater. Moisture and various liquids or moisture may contain minerals that can corrode electronic circuits. If the machine comes into contact with water or if it is immersed in water, it will damage the parts and cause irreparable damage.
- 3. Do not use or store the machine in dusty or dirty areas. This will damage its detachable parts.
- 4. Do not place the machine in an overheated place. High temperatures can shorten the life of electronic devices, destroy batteries, and deform or melt some plastic parts.
- 5. Do not place the machine in a cold place. Otherwise, when the temperature of the machine rises or reaches normal temperature, moisture will form inside the machine, which will destroy the board.
- 6. Do not knock or shake the machine. Rough handling of the machine will destroy the machine.
- 7. Do not attempt to disassemble the machine. Non-professional handling of the machine can damage the machine.
- 8. Do not use harsh chemicals, detergents or strong detergents to clear the machine.
- 9. Keep away from electromagnetic, radioactive or magnetic fields when using or storing the machine.
- 10. Wipe the screen with a soft, clean cloth. Do not use plain paper to wipe the screen.
